Nebraska Electronic Funds Transfer (EFT) Credit Procedures

ACH Credit is an EFT payment option that requires you or your financial institution to use computer software to originate your tax payments. This software must create an electronic file in the required format, and submit this file to the Federal Reserve. This file instructs your bank to "credit" the state's bank.

If you have selected ACH Credit as your payment method, please follow these procedures to begin sending tax payments to the Nebraska Department of Revenue (Department).

1. Provide a copy of the Nebraska ACH Credit CCD+ Addendum Record Format (Attachment A) to your software provider for customization, if needed.
2. Provide a copy of the Nebraska EFT Bank Accounts (Attachment B) to your software provider.
3. Determine the data fields you must have coded in your ACH addendum record. This includes the two-digit prefix for the tax type being paid (see page 5), your Nebraska ID number, your tax type, and the tax period for which you are reporting. Your Nebraska ID number and tax type should remain constant; however, your tax period ending date will normally change with each payment you send. If you are a corporation income taxpayer, use the year-end month for your tax period.
4. When you are ready to make a payment, arrange for the creation and transmission of your ACH Credit files to the State's bank.

Attachment A: Nebraska CCD+ TXP Addenda Format

The Department requires use of the ACH Cash Concentration and Disbursement Plus (CCD+) format for EFT credit payments for tax liabilities. The plus (of “CCD+”) represents the Addenda Record used to transmit your tax payment information. In an effort to provide greater uniformity to multi-state taxpayers, this addenda format also follows the Tax Payment (TXP) Banking Convention recommended by the Federation of Tax Administrators. When creating your file, this record must be formatted according to the following Nebraska CCD+ TXP format specifications.

Please verify that your contracted ACH provider or software can generate the Addenda Record according to these specifications.

ACH Credit Record Field Definitions and Examples

The numbers below correspond to the field numbers shown on previous page.

EXAMPLE

You are ABC Manufacturing, Inc. (Nebraska ID number 021-000392551) and you are making a quarterly withholding tax payment, for the first quarter of 2013, in the amount of \$21,487.55. Your Addenda Record should contain the following information in positions 1 through 52:

1 2 3 5 7 9 11 13 15
705TXP*21000392551*01100*130331*T*0002148755*ABC MA\

- 1 **RECORD TYPE CODE** (required) must always be coded as "7".
- 2 **ADDENDA TYPE CODE** (required) must always be coded as "05".
- 3 **SEGMENT ID** (required) identifies the transfer as a tax payment. It must always be coded as "TXP".
- 5 **TAXPAYER ID** (required) is an 11-digit number made up of a two-digit prefix and a nine-digit suffix.

The prefix is constant for a specific tax type. See the table below for valid prefixes. The suffix is the last nine digits of the state-assigned Nebraska ID number. If your Nebraska ID number is less than nine digits, add zeros on the left to make a nine-digit number.

Do not include any preceding numbers, dashes, trailing numbers, or spaces when formatting your Nebraska ID number.
